# HyXin 12V 6Ah LiFePO4 Lithium Battery SC series - Series Connection Capable 

Crafted out of Lithium Iron Phosphate (LiFePO4) technology, this is a battery built to last. With 2,000+ recharge cycles (and up to 7,000 under ideal charging conditions) the 6 Ah provides 5 x the lifespan than your typical SLA battery. Combine 2 for 24 Volts or 4 for a 48 Volt system. ideal for industrial purposes where you need a long lifespan battery that charges quickly, or for outdoor uses like hiking or camping where weight is at a premium.

## SERIES CONNECTION CAPABLE

The SC series allows for up to 4 batteries connected in series or 10 in parallel, but not concurrently. The batteries must all be matched at voltage levels, capacity, state of charge, date of manufacturing, and chemistry.

## BENEFITS OF LITHIUM

Lithium offers several perormance benefits versus it's sealed lead acid (SLA) equivelant. A lithium battery's capacity is independent from the discharge rate and provides constant power throughout it's discharge. The degredation of a lithium battery at a high temperature is significantly reduced in comparison to SLA. Lithium has ten times the cycle life as SLA at room temperature. Even at an elevated temperature, lithium still has increased cycle life over SLA at room temperature.Lastly, Lithium charging follows a similar charging profile as SLA, Constant Current Constant Voltage (CC/CV). However, lithium can be charged faster, without the need for a maintenance float charge.
